

ePLAN REVIEW: TRACKING PLAN MARKUPS AND COMPLETING TASKS

- If changes are required to submitted drawings, applicants will receive an email to log into ProjectDox and view the new “active task”
- Accepting the task opens an “e-form” which details the changes needed as well as any reviewer comments
- Applicants make the requested changes to their file, then upload the revised file keeping the original file name to establish a versioning history
- Important! Applicants must then return to the e-form and click “Upload Complete” – this removes the active task from their workflow and begins the new review cycle
- Changes can also be tracked by going to the “ChangeMarkReports” folder within the project and opening the combined comment report (updated at the end of each review cycle)
