

**Young-Min Kang**

## *Austin Downtown Night Cruiser, 2009*

Digital images on Dibond panels  
(part of the AIPP collection)

This photo-sculpture is a futuristic transformation of the city based on real images of downtown Austin at night combined with the dream of space travel. The sculpture consists of over 126 uniquely cut and shaped panels with photo-imagery applied. From nose to tail the sculpture spans over 18 feet. A daytime version of the *Cruiser* can be seen on the west mezzanine wall across gate 13.

**Location: East mezzanine wall across from Gates 6-7**
