

Austin Dimensions

Holograms of Music - Nature - Technology, 2001

Holograms made possible by:

Samsung - sponsor

Zebra Imaging - production

frog design - image design

Enjoy walking by and viewing these three unique holographic panels with images of Austin music, creeks & rivers underwater and high-tech networks that appear to pop out from the flat panels. Each panel measures over ten feet wide and is suspended over the sliding exit doors to the outside pick-up lanes. The music panel with a bright guitar includes lyrics from Gary P. Nunn, “...the friendliest people and the prettiest women...”

At the time of installation the three panels taken together represented the world’s largest holographic display.

Location: Bag claim level, above the doors across from the Barbara Jordan statue
