

**A second phase
of transit, bike
and pedestrian
improvements
is coming in
summer 2020!**

Improvements benefit everyone, whether you walk, bike, drive or take transit.

COMING SOON!

SUMMER 2020: MOBILITY & SAFETY IMPROVEMENTS

Last year, the City of Austin's Corridor Program Office (CPO), the Austin Transportation Department (ATD) and Capital Metro (CapMetro) collaborated to improve one of the highest-volume passenger corridors in the CapMetro system. Buses began using the bus-only contraflow lane on August 18, 2019. We are partnering again in 2020 to further improve transit reliability and upgrade bicycle and pedestrian infrastructure.

- 1 18th St. (Lavaca St. to Guadalupe St.):** concrete paving and raised curb to protect bike lane
- 2 Martin Luther King Jr. Blvd. (Lavaca St. to Guadalupe St.):** new shared-use path
- 3 Lavaca St.:** upgraded crosswalks at 18th St. and Martin Luther King Jr. Blvd.
- 4 Lavaca St. (18th St. to Martin Luther King Jr. Blvd.):** pavement resurfacing, restriping, new red paint and protected bike lane on east side
- 5 Guadalupe St. (Martin Luther King Jr. Blvd. to 20th St.):** new northbound bus-only lane with red paint
- 6 Guadalupe St./Martin Luther King Jr. Blvd. intersection:** new bike and pedestrian crossing

Construction will occur in phases. We anticipate that work will begin this summer and be complete this winter. Work will occur daily from 7am–7pm, and will require intermittent lane closures to make space for crews to work safely.

The improvements are part of the Corridor Construction Program (CCP) that is funded by the 2016 Mobility Bond. The CCP includes mobility, safety and connectivity improvements to nine Austin corridors.

More information about other improvements coming to the Guadalupe Street corridor can be found online at AustinTexas.gov/GuadalupeStreet.

Email us at GuadalupeStreet@AustinTexas.gov if you would like to receive updates about construction progress and impacts.
