design professionals and
artists

Registration Ends:
Submissions Due:
Top Three Finalists Revealed:

05/03/13
07/12/13
08/09/13

Top **three** finalists
will be awarded
\$5000 each

About

The design challenge is for an adaptive reuse of a power plant intake facility in Austin, TX. The site is on the banks of Lady Bird Lake and within the Park and trail system. From the West the facility is a gateway into downtown Austin.

Entries should reinterpret, envision and create a site and building that is for Park related use and responds to the surrounding changing environment while engaging the trail and park users and the water. Entries will create a vision of the facility as a new community destination.
