# Duncan Park Preliminary Plan

## Q2 If you selected other as your top priority for Duncan Park, what other element should be included in the Preliminary Plan?

Answered: 10 Skipped: 24

#	Responses	Date
1	Access to the creek. Terraced steps to it so that there is a meditation area on the bank. I would suggest reducing the riparian planting (much will be lost in flooding) and replace that with bank stabilization that would also offer seating and/or stream side access.	4/27/2017 10:28 AM
2	The most crucial element is sustainability of a logical design, SO the installation of Purple Pipes for Reclaimed Water for the entire park is important. Watershed should have been at the last meeting? This important element of design needs to be worked out and rather quickly	4/26/2017 5:26 PM
3	NA	4/25/2017 11:49 AM
4	Water containment	4/18/2017 10:25 AM
5	Fascinating that most of my selections above will not save....	4/17/2017 5:37 PM
6	-	4/17/2017 2:40 PM
7	A playground.	4/17/2017 10:15 AM
8	High Quality Playscape - this is Downtown's one opportunity for it.	4/16/2017 11:18 PM
9	Bmx facilities support	4/12/2017 12:06 PM
10	No lighting plan is apparent. I would like to see improved lighting for nighttime safety. Solar powered light poles along the creekside path would be ideal. Also city owned land on the SW corner along 9th street (blocks 4-9) is isolated - create access from Lamar @ 9th to enhance access to the south bank of the creek and or tie-in to the proposed walk-bridge.	4/11/2017 2:16 PM

# Duncan Park Preliminary Plan

## Q3 Is there any other additional feedback about the plan that you would like to share?

Answered: 24 Skipped: 10

#	Responses	Date
1	The plan looks great, but I really wish we could provide irrigation for the lawn, wetland and trees - even if it would only be used in extreme drought conditions.	4/27/2017 10:28 AM
2	As a plan progresses, there should be an Operational/Maintenance Plan developed for added sustainability. As for modified "Great Street", there should be no typical "Great Street template used at Duncan Park. There certainly can be certain elements pulled from the Great Street Plan and incorporated. "view corridors" should be identified and respected. The last thing Duncan Park needs is "over landscaped design"	4/26/2017 5:26 PM
3	I would love to see Duncan Park become a beautiful place full of natural beauty. But any sheltered areas or seating will attract hordes of street people who will immediately take up residence.	4/25/2017 3:55 PM
4	Please make the covered picnic area with a nice trellis. Trail lighting is important for safety.	4/25/2017 12:21 PM
5	It looks really nice! I love the on site stormwater biomitigation features, the native gardens, the covered shade area and its connection to the street.	4/25/2017 12:11 PM
6	I appreciate the thoughtful preservation of green space, as well, creating a space for people to visit.	4/25/2017 12:10 PM
7	less is more	4/25/2017 12:04 PM
8	great plan	4/25/2017 11:49 AM
9	I believe the most important thing here is to build something that will require little maintenance that lasts. While I like the added features like the restroom and boardwalk, I don't want to see those amenities deteriorate over time.	4/18/2017 11:24 AM
10	Native and drought tolerant plants should be a priority.	4/17/2017 10:44 PM
11	Where are the funds coming from to pay for this park? If it is tax dollars I suggest at this critical time in the budget there are better uses of our tax money....perhaps to pay for the \$35MM over run on the new library.	4/17/2017 5:37 PM
12	Please, please OPEN the SHOAL CREEK TRAIL to Lady Bird Lake! Its been CLOSED for almost 5 years. Please make the construction companies open and protect the trail where it enters the Lady Bird trail.	4/17/2017 2:55 PM
13	Please provide clean accessible restrooms in this park. They are needed along the trail. I like the wetland but I want as little concrete added to the park as possible.	4/17/2017 2:52 PM
14	The current park, without modification, is superior to this overall plan. It is a classic simple park and does not need any of the features you propose (however, traffic calming / great streets would be nice). In particular, I am concerned that adding a restroom will be a magnet for homeless / increased drug activity. Also, while some of your proposed enhancements to greenery / wetlands are a plus, there is too much new concrete / ground covering that would be out of character for the park and risks making the park ugly.	4/17/2017 2:40 PM
15	Holy confusing list of options! If I were a full time landscape architect, I'd probably know what most of those were. After my 7th selection, I was just making things up - bioswale? riparian? I have no idea what those are. I bike through that park daily. I didn't mark other (I don't want to go through an re-rank everything after screwing up the list a few times already). But, the hike and bike trail under the bridge could use some re-routing to make a less treacherous path. I'm always a little concerned that the sharp, quick turns I need to make to go around the tree on the Duncan Park side and avoid the retaining wall existing on the opposite side will be the end of me. This is especially true when it's wet. And I bike slow through that section.	4/17/2017 1:27 PM
16	I don't see handicapped access. That concerns me; my mom uses a walker and steps aren't going to get it for her.	4/17/2017 1:10 PM
17	Please keep the park as open as possible to keep the population of homeless/transients down. Lots of kids frequent this park. It's a lovely plan but provides a lot of hidden sleeping areas.	4/17/2017 10:58 AM
18	maybe connect with the bmx portion a little more.	4/16/2017 11:18 PM
19	More lawn, less trail/pathway around the lawn	4/15/2017 2:02 AM
20	Please don't ruin the open area or put in children's stuff!	4/14/2017 4:44 PM
21	I think the boardwalk is a really creative idea	4/14/2017 4:05 PM
22	Keep it simple and address basics and necessities first	4/12/2017 12:11 PM
23	Historical and informational signage for the bmx park.	4/12/2017 12:06 PM
24	I object to the following elements: wet meadow, bio-swale and enhanced wetlands areas. These will be stagnant and with no source of regular recharge or through-flow, will become mosquito breeding habitat. Instead this redesign should improve current drainage which has created an isolated wetland. The proposed redesign features will create a federal regulated wetland area and will erode the usable acreage of the park for public recreation purposes both under the present plan and in the future as the created wetland area grows. It appears that nearly 40-50% of the proposed park area will no longer be accessible for recreation.	4/11/2017 2:16 PM
