

General Overview of Weatherization Measures

Doing Business with Austin Energy's Weatherization Program

Austin Energy offers free home energy improvements to customers with low-to-moderate incomes. The improvements reduce energy costs and enhance indoor comfort. Improvements are performed by Weatherization Contractors selected through a City of Austin procurement process to perform the work. Contractors selected to weatherize homes must be able to perform the work and pass final inspections. Weatherization Contractors should be experienced in performing or installing the following categories:

CFL Replacement	Solar Screens
Air Infiltration	Attic Insulation
Duct Sealing, Repair Replacement	Water Conservation
Installing CO & Smoke Detectors	

This workshop is to provide a general overview of Weatherization Measurements to succeed as a Weatherization Contractor on future Austin Energy contracts. We encourage certified minority and women-owned businesses interested in doing business with Austin Energy as a Weatherization Contractor to attend this workshop.
