

The Waste Reduction Assistance Program (WRAP) is voluntary, confidential and free of charge. WRAP's staff will make recommendations to help your business reduce waste quantity, decrease disposal costs, improve operational efficiency and conserve natural resources. Contact Solid Waste Services at 974-9727 to make an appointment for a waste assessment visit, at your convenience. Prior to the staff visit, these are the questions that you can answer:

Size of your business and number of employees _____

Person in your business responsible for contracting for waste collection _____

Type(s) of recyclables and estimated quantities _____

Size of current waste container(s) _____

Number of container(s) _____

Number of pickups per week _____

Current waste hauler _____

Current waste collection costs _____

Any hazardous waste? _____

Currently recycling? _____

Main waste problem _____

WRAP's professional staff will make an appointment to meet with you and review your operations and inventory your waste. Following the on-site assessment, the staff will compile a report based on your current waste disposition and provide recommendations on how to decrease the amount of waste generated, recycle and purchase environmentally preferable products.

Once your business adopts two or more recommendations and can demonstrate its commitment to waste reduction, you are invited to be recognized as a WasteSMART business. Recognition includes a certificate and inclusion in an annual advertisement produced by Solid Waste Services.
