

THIS ISN'T JUST A CIGARETTE. IT'S TOXIC WASTE.

Cigarette butts are the most common form of litter. And virtually all litter ends up in our streams and lakes. Cigarettes pose a serious litter and toxic waste problem. Worldwide, 4.5 trillion cigarette butts make their way into the environment each year.

ONE BUTT CAN KILL

Cigarette butts are toxic. In fact, just one cigarette butt in about a liter of water can kill fish. That's because cigarettes contain harmful chemicals like ammonia, cyanide, mercury, lead, and arsenic.
