

Examples of Approved Lighted Exit Signs

LED Exit Sign

Standard AC wiring with battery backup.
Red or Green is acceptable.

Self-Luminous Exit Sign

No electricity required. They use a glowing-type of hydrogen gas, called tritium, to remain illuminated day and night.

Photoluminescent Exit Sign

“Glow-in-the-Dark”. No wiring to the sign is required. It usually requires a 5 foot candle unfiltered fluorescent lighting be shining on it at all times, so it will “glow” when power is lost.

LED Exit Sign with Emergency Lights

**** Whichever is chosen for use must be UL Listed and installed according to the UL Listing and the Manufacturer’s Recommendation.**
