Congress Avenue Urban Design Initiative Community Meetings

The City of Austin, in partnership with the Downtown Austin Alliance (DAA) and various community stakeholder groups, is hosting two public meetings to gather community feedback as a new vision for Congress Avenue is developed. This new vision will provide direction for an urban design initiative, which will inform plans for future improvements to Congress Avenue.

These meetings will be the first in a large-scale public engagement process, during which the City and the DAA are committed to involving the community to best assess the needs of our constituents and make this initiative a success.
