

Seeking Care During COVID-19

 Are you just worried?

 Did you travel?

Do you think you came in contact with someone with COVID-19 but have no symptoms?

Stay Home

Do not overwhelm medical staff by going to the hospital without serious symptoms

 Fever, cough, headache, runny nose, loss of sense of smell or taste, sore throat, diarrhea?

Call for Advice

Use telehealth or call your primary physician

 Difficulty breathing, chest pain, confusion, or fever that doesn't respond to medication?

Seek Care

Call 911 or go to the emergency department
