

2013-2014 Bright Green Future Grants: High School Recipients

Eastside's Garden and **Outdoor Classroom** will revitalize an existing vegetable garden and incorporate native vegetation, compost bins, and water catchment receptacles.

Garza's Garden will include a community garden, landscaping with native plants, compost areas, an outdoor classroom, rainwater collection areas, and building recycling.

A new **Outdoor Classroom at Travis** will teach students about the entire cycle of food growth, from soil preparation to harvesting, with a new garden, compost system, flow form, and wicking bed for plant growth.
