

Commercial Water Conservation Technical Workshop To be Held on September 24, 2014

Austin Water and the Lower Colorado River Authority will hold a **free** water conservation technical workshop on September 24, 2014 for industrial, commercial and institutional customers and facility managers and engineers on water saving measures, technologies, and rebate programs. The meeting will be held at LCRA's Dalchau Service Center, 3505 Montopolis Drive, Austin, Texas, from 9:00 a.m. to 3:30 p.m. **Lunch will be provided.**

Topics at the meeting include:

- Drought Outlook
- Lake Level Conditions, Projections and LCRA's Water Management Plan
- City of Austin Drought Response Update
- New Guidelines and Incentive Programs for Auxiliary Water Systems
- ICI Water Use Benchmarks to Identify Potential Water Savings
- Lessons Learned - Water Saving Ideas for the Commercial Sector From Breweries and Distilleries
- Mandatory Irrigation System Inspections and Car Wash Certification
- AWU and LCRA Commercial Incentive Programs

Staff from Austin Energy, Texas Gas Company and Austin Resource Recovery will also be available at the workshop to answer questions about their conservation incentive programs.

For more information about the workshop or to RSVP, please contact Mark Jordan, Water Conservation Program Coordinator, Austin Water, at (512) 974-3901 or by e-mailing mark.jordan@austintexas.gov. **Please RSVP not later than September 17, 2014 so we can ensure we have a place for you at this event.**
