

# Open Government Partnership: Mid-Year Reflection Tool

**Project:**

*Describe how your project reflects the OGP values of accountability, transparency, civic participation, and technology innovation*

**Project status**

*Is the project on schedule/behind schedule? What changes in scope have you experienced? Who is working on what, and how is it getting done? Who is involved with the effort (OGP calls this "answerable")?*

**Desired Outcomes**

*For example, how will there be more information for the public, greater government capability, or more/better opportunities for civic participation/accountability/transparency? How will this outcome be transformative?*

**Exploration Questions**

*Open questions that we may need to answer to reach our desired outcomes.*

**Challenges, Milestones, & Victories**

*What challenges are you facing that may have a positive/negative impact on the project? What aspects of your work are substantially or fully complete?*
